ENVOY+ UPGRADE KIT

ENVOY+ is the first step to overhaul Envoy lane machines. Purposefully designed to improve reliability, ease of use, and aesthetics of Envoy.

The **ENVOY+** Upgrade Kit consists of: two 10.4" Android based touchscreen tablets, a new set of black covers, and the necessary adapter cabling, shims, and hardware for installation. This kit gives you the look and feel of our best-selling MAX lane machine, but in a package that is compatible and specifically designed for current Envoy owners, and at a fraction of the cost of MAX.

We designed and built your Envoy to last, so your center may not be ready to upgrade to a MAX lane machine. But we live in a world of touchscreen devices; you should expect nothing less installed in your lane machine.

ENVOY+ BRUNSWICK CLOUD UPGRADE KIT

ENVOY+ Brunswick Cloud is the second upgrade kit for Envoy lane machines, reaching the pinnacle of performance. Utilizing all remaining hardware from our premier machine, MAX, this kit installs our unrivaled technology stack that enables frequent software updates, access to an extensive pattern library, and communication with Brunswick support staff – all wirelessly through Brunswick Cloud. These Wi-Fi enabled features allow new tools and features to be pushed to our large network of Brunswick Cloud enabled machines around the world in real time.

UPGRADE YOUR WAY

BRUNSWICK CLOUD

Brunswick Cloud is an integral part of the Brunswick experience. Users with Brunswick Cloud accounts will be notified of software updates, feature enhancements, and have access to advanced pattern management all directly from their tablets over Wi-Fi. For existing or new SYNC scoring customers, Brunswick Cloud unifies all your equipment into one single ecosystem of tools to make running your center as simple as possible.

BRUNSWICK CLOUD PATTERN MANAGER

As of 2023, Pattern Manager gets a new look! Previously used as a freestanding desktop application, Pattern Manager is now integrated into Brunswick Cloud. Customers now can edit, create, and manage their pattern libraries wirelessly from any web supported device. Additionally, customers can shop the largest and most comprehensive pattern library in the industry. Patterns can then be sent straight to Brunswick Cloud enabled machines – MAX and **ENVOY+ Brunswick Cloud**.

USER INTERFACE

The **ENVOY+** kits features a 10.4" Android-based touch screen tablet that is easy and intuitive to use. This is the same functional and durable tablet used in Brunswick's SYNC™ scoring and management system. The tablet features a large screen with easy-to-navigate main menus across the top and sub menus on the left.

MADE IN THE USA

The MAX, **ENVOY+ Brunswick Cloud**, **ENVOY+**, Envoy, and A22 lane machines were engineered by Brunswick's team of experienced engineers and technicians at the world headquarters in Muskegon, Michigan. Assembly, final quality checks, and shipping also occur at this location.
